Aided Language Modeling: Rationale, Evidence Base, and Implementation

Presented By: Pat Mirenda, Ph.D., BCBA-D

This session will introduce aided language modeling (ALM), a strategy that is used to support language development with minimally verbal individuals who rely on augmentative and alternative communication (AAC). The presentation will include a rationale for the use of ALM, a summary of ALM research to date, and strategies for designing and implementing ALM with inidividuals who have autism and other developmental disabilities. Videotaped examples of ALM will also be provided.
